

February 11, 1947

Dr. M. Demerec,  
Director  
Long Island Biological Association  
Cold Spring Harbor  
Long Island, New York

Dear Doctor Demerec:

In reply to your letter of January 28, 1947 I should like to say that I shall be happy to take part in the symposium at Cold Spring Harbor this summer. Before sending you the exact title of my talk on the questionnaire that came with your letter, I should like to inquire whether my contribution is one of several on under nucleic acids and nucleoproteins of bacteria or whether my paper should give a more comprehensive picture of the subject than would be the case if I were to limit myself to my own work.

Sincerely yours,

E. Chargaff
